

Catlin Casualty Reinsurance

Underwriting Appetite

Casualty Reinsurance is written by teams specialising in US and International business. All are considered market leaders in their field and are happy to consider clients' individual requirements and work with them to provide bespoke products.

The US Casualty Reinsurance book is a long established portfolio at Catlin, and is written predominantly on a non-proportional basis. Underwriters are happy to consider offering support to primary insurers, insured-owned captives, mutuals and risk retention groups.

The non-US portfolio has been expanded to include classes including Public and Products Liability, Employers Liability and PI as well as Motor, also predominantly on a non-proportional basis. The book offers protection to primary insurers based in the UK and Overseas. All Catlin offices will be happy to work with clients to offer solutions.

Coverage

This long established portfolio of US Casualty business is underwritten by a group of experienced underwriters. The principle classes of business include:

- Medical Malpractice
- Professional Liability
- General Liability
- Automobile Liability
- Workers Compensation

Our non-US Casualty portfolio can cover:

- Public Liability
- Products Liability
- Employers Liability
- Motor
- Professional Indemnity
